WORK EXPERIENCE

New York Minute Magazine – Web Developer Intern, November 2019 – Present

Remote Internship

- Instrumental in optimizing WordPress website speed using image compression, removing render-blocking JavaScript, and integrating (content distribution network) CDNs.
- Developing a python script to fetch featured blog images to be used in a database to prevent any copyright claims and also store the image.

Technology Services - Business Application Student Assistant, May 2017 – April 2019

Machester University, North Manchester, Indiana

- Assigned to create, modify, and review electronic forms using Microsoft InfoPath
- Served as an assistant to the Portal Application Administrator to test new functionalities added to the Manchester University website such as the payment system.

SKILLS

Proficient	Java	JavaScript
	SQL	Figma/Sketch/Adobe XD
	React	Git/GitHub
Experience	ArcGIS	Python
	R	MongoDB
		Agile Scrum

PROJECTS & LEADERSHIP

- Contributing to open source projects including npm modules and the Gatsby JS framework (refer to GitHub)
- Solving coding challenge questions from my high school Java textbook and open sourcing it (refer to GitHub)
- Developing a web application as part of the Cloud Computing course using agile Scrum. The web app uses the Canvas LMS API to allow professor to update courses, create templates, and manage student groups with ease.
- Kappa Mu Epsilon (Mathematics Honor Society), Member (2018 - Present)
